

L-G VK Saxena launches integrated Job Portal for Ladakh

Dedicated platform to connect job seekers and employers through a single-window digital interface

L-G says portal would provide equal access to opportunities for youth from all parts of Ladakh

Leh, June 4: In a significant initiative aimed at strengthening employment opportunities across the Union Territory, Lieutenant Governor, Shri Vinai Kumar Saxena, today launched the Integrated Job Portal Ladakh, a dedicated online employment platform designed to connect job seekers and employers through a seamless, transparent and technology-driven ecosystem.

The portal (<https://jobportal.ladakh.gov.in>) has been developed following the proactive intervention and vision of the Lieutenant Governor to create meaningful livelihood opportunities for the youth of Ladakh and establish a centralized platform for employment-related services. The portal will facilitate access to a wide range of employment opportunities, including full-time, part-time, contractual and outsourced positions across different sectors.

Employment remains one of the most important issues for the youth of Ladakh. In the absence of a dedicated employment portal, job seekers often had to browse multiple websites, social media platforms and informal channels to search for vacancies, making the process cumbersome, time-consuming and fragmented. The integrated Job Portal Ladakh seeks to address this challenge by bringing together employment opportunities from various sectors on a single platform, enabling applicants to search and apply for jobs with ease.

The portal has been developed with the objectives of providing a centralised employment platform for Ladakh, connecting job seekers with employers across sectors, simplifying recruitment processes, promoting transparent and accessible employment opportunities, local economic growth, and enabling data-driven employment planning and governance. It would significantly reduce paperwork and administrative burden, enable real-time employment analytics and promote local talent across the Union Territory.

L-G Shri Saxena said that employment is not merely about filling vacancies but about creating opportunities, nurturing talent and enabling aspirations. "The integrated Job Portal Ladakh has been created to bridge the gap between job-seekers and employers by providing a single-window digital platform where they can connect seamlessly. It is not merely a website but a complete employment ecosystem that will empower our youth, simplify recruitment processes and create a transparent and accessible employment environment in Ladakh," Shri Saxena said.

Highlighting the broader significance of the initiative, L-G Shri Saxena observed that the portal would provide equal access to opportunities for youth residing in remote villages as well as urban centres.

Designed as a one-stop solution for employment needs in Ladakh, the portal aims to bridge the gap between job seekers and employers by leveraging technology to create a seamless and efficient recruitment ecosystem. It seeks to empower local talent by providing access to quality employment opportunities while assisting businesses, institutions and organisations in identifying suitable candidates for their workforce requirements.

The platform offers several user-friendly features, including creation of professional candidate profiles, online job search, easy application submission, real-time application tracking and direct communication between employers and applicants. Employers can post vacancies, specify job requirements, screen candidates using advanced filters and connect directly with prospective employees through the portal.

Shri Vinai Kumar Saxena
HON'BLE LIEUTENANT GOVERNOR
Union Territory of Ladakh
