

Mimang-Si-Sjabstogs: Administration at Your Doorstep Held at Nang Village

Leh, November 20, 2025: Under the ongoing “Mimang-Si-Sjabstogs” (Administration at Your Doorstep) initiative, a public outreach camp was organised today at the Panchayat Centre, Nang, with active participation from villagers and officials from various government departments.

The Village Nambardar welcomed the Nodal Officer and departmental officials with traditional khataks and expressed his gratitude for their presence. Addressing the gathering, Nodal Officer Khadim Hussain, Deputy Director, Archives, Archaeology & Museum, Leh, highlighted that the Mimang-Si-Sjabstogs programme aims to bridge the gap between the administration and the public by delivering government services directly at the grassroots level. He encouraged villagers to interact freely with officials, raise their concerns, and submit grievances for timely redressal through proper channels.

In his capacity as Deputy Director, Archives, Archaeology & Museum, he also explained the importance of heritage conservation and urged the community to preserve Ladakh’s traditional and cultural heritage. He further informed the public about the Heritage Week, being observed from 19 to 25 November, and emphasised its significance.

Dr. Thubstan Nurboo from the Cultural Academy, Leh, spoke about the importance of heritage preservation and informed the gathering that the “Awareness Programme on the Importance of Heritage of Ladakh” commenced on 19 November and is currently ongoing. He stressed the need to educate the youth about Ladakh’s rich heritage and encouraged villagers to motivate young people to participate actively.

Officials from various departments shared details of their schemes and services, while villagers raised queries and concerns related to the Jal Jeevan Mission, MGNREGA, network connectivity, school building repairs, and other local issues.

During the campaign, 35 Aadhaar cards were updated, ABHA cards and Golden Cards were generated on the spot, and around 40 individuals underwent NCD screening, including checks for blood pressure, haemoglobin, and blood sugar levels.
