

Diarrhoea Campaign Launched at PHC Khaltsi under Month of Compassion Initiative.

Khaltsi, July 23, 2025 – As part of the ongoing Month of Compassion initiative, the Stop Diarrhoea Campaign was launched at Primary Health Centre (PHC) Khaltsi on 10th July 2025. The event witnessed active participation from the Block Medical Officer (BMO), Pediatrician, Community Health Officer (CHO), Child Development Project Officer (CDPO), Supervisor, ANMs, ASHAs, and Anganwadi Workers (AWWs).

During the campaign, ORS and Zinc distribution was carried out in collaboration with the Health Department, Khaltsi. All Anganwadi Workers were instructed to set up ORS & Zinc Corners at every Anganwadi Centre (AWC) under the Khaltsi project to ensure timely management of diarrhoea cases, especially among children.

The campaign aims to raise awareness about safe hygiene practices, the importance of ORS and Zinc in treating diarrhoea, and to reduce diarrhoea-related illnesses in the region.
